ONLINE TRAINING
FIRE MARSHAL

Courses Information sheet for

Online Fire Marshal

RoSPA Approved

RoSPA Approved E-learning course

Current legislation, The Regulatory Reform (Fire Safety) Order 2005, applies to all workplaces regardless of the number of employees and requires employers to provide adequate training in fire awareness for all members of their staff.
Our online fire safety training course is aimed at all employees to assist them in identifying and reducing the risk that fire presents in the workplace.

Fire marshals (sometimes known as fire wardens) are civilians trained to assist in emergency fire evacuation procedures at businesses and other organizations.
It is a legal obligation that workplaces must have a sufficient number of fire marshals to deal with fire emergencies.

This course provides extensive knowledge of fire prevention, evacuation protocol and using fire extinguishers.

The course consists of 16 modules with questions at the end. You are given the chance to review all your answers at the end of each module before final submission and you will be given 3 attempts at each module to achieve a pass rate of 70% or higher (except module 16 which requires a 100% pass rate).

Duration: approximately 220 minutes
(Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions).

The course consists of 16 modules with questions at the end. You are given the chance to review all your answers at the end of each module before final submission and you will be given 3 attempts at each module to achieve a pass rate of 70% or higher (except module 16 which requires a 100% pass rate).
