

## Qualitative Respirator RPE Face Fit Testing

For RPE to be suitable it must be matched to the job, the environment, the anticipated airborne contaminant exposure level, **and the wearer**.

As people come in all sorts of shapes and sizes it is unlikely that one particular type, or size of RPE face piece, will fit everyone. Fit testing will help ensure that the equipment selected is suitable for the wearer

We offer individual Face Fit Tests from only £15 per test. Half and Full day options available. We come to you, or go to your RPE Wearers on site (travel expenses may be charged)

RPE fit testing should be conducted by a competent person. Competence can be demonstrated through achieving accreditation under the **fit 2 fit** RPE Fit Test Providers Accreditation Scheme. This Scheme has been developed by the British Safety Industry Federation (BSIF) together with industry stakeholders and is supported by the HSE

We carry a range of respirators and half masks in order to ensure efficient compliance and correct fit
