

# THE Solution for the Smaller Face

**Specifically designed to solve an industry-wide problem**

Conforms to EN149:2001 + A1:2009 FFP3 NR

The **Alpha S** has been specifically designed to ensure an excellent fit on the smaller face.

The unique inner face seal helps maintain a close and snug fit around the chin area which is generally regarded by experienced fit testers to be the main weakness on standard design disposable respirators.

Working very closely with the fit2fit accreditation scheme and numerous users, Alpha Solway has developed a simple solution to an industry wide problem.

The **Alpha S** has many features together with the unique inner face seal, they include a 4 point adjustable head strap, the latest filter technology to reduce the breathing resistance and a pre formed nose bridge that maintains a consistent fit.

The **Alpha S** conforms to **EN149:2001 + A1:2009 FFP3 NR**

## The **Alpha S** Challenge

Alpha Solway are so confident that the alpha S will fit staff who previously failed on other disposable respirators, that we will Face Fit Test **FREE\*** your staff using the Quantitative method (Portacount) to demonstrate its effectiveness.
