

COSHH. Control of Substances Hazardous to Health 2002 – Comprehensive Awareness Training

Duration 6 to 6.5 hours Delivered by qualified (NEBOSH L6 Diploma) Trainer (City & Guilds)

Training Workshop Aims

To gain awareness and knowledge in order to help us to,

- Sufficiently contribute to the organisations control of substances hazardous to health
- Confidently understand and contribute to the process of COSHH risk assessment and a culture of good practice
- Attain Pass/Merit/Distinction certification

Objectives

To have a knowledge of;

- COSHH Health and Safety legislation
- Our responsibilities under legislation
- Options in COSHH Risk assessment and management

To have answers to all of these questions;

- What is COSHH
- Why do we need COSHH
- What are substances hazardous to health
- How do we best control substances and risk
- What does a 'suitable and sufficient' COSHH risk assessment involve?

To test what we have learned;

- Engage and contribute during the learning
- Complete a multiple choice measurement of the learning.

Learning by delivery of

Tutor information, group activity and discussion, visual aids, DVD, PowerPoint and workbook

To include;

- Substance and hazard history
- COSHH regulations
- Other related law and regulation
- Risk assessment – suitable and sufficient criteria
- Material Safety Data Sheets and Procedures
- Types of substance hazard and risk
- Health effects
- Identification, Information, Packaging, Labelling
- Control and containment measures and practical implementation
- COSHH hierarchy of control
- Monitoring exposure
- Health surveillance
- Emergency and chemical spill procedures
- Hazardous waste
- HSE COSHH Essentials

To take away

- Training workbook
- Certification (when passed)
